Concern: International Innovation Management

Dear Mr Campisi,

Are you in need of innovation? Are you attracted by team working and open-minded people? Do you want to see new way to solve problems?

As a media engineer at the HEIG-VD, I'm asked a lot that type of questions and learn everyday new way to answer them. Indeed, I have various classes as management, communication, marketing and coding. The "international innovation management" class could allow me to perfect those knowledges by practicing them and it would be a chance to perfect my English.

I am a very creative person filled with enthusiasm and energy. Thanks to my studies and student jobs, I have learned to be methodic and independent. Furthermore, I would like to go abroad after graduation and this experience would be an amazing opportunity for my career. I even have an idea on my own and I think this class is the perfect occasion to answer my questions.

Having the opportunity to work with students from other departments , going abroad, attending to workshop and other activities you propose, is rare and it is a chance I'm willing to take!

I have attached my resume and I am looking forward to meeting you. Thank you for your time and consideration.

Yours sincerely,

Noémi Lopez
